

DESLOPPING FACILITES

- *In Damen Shiprepair Brest, we have deslopping facilities in dock or alongside our facilities (if docks are not immediately available).*
- *The ship can directly proceed from sea to dock, mooring alongside in dock, dock gate remains opened.*
- *Connection to ship is made and slop transfer is done through an underground existing line directly to the deslopping station.*
- *This avoid extra tugs / pilots / line handlers costs of shifting the ship.*
- *When deslopping operation completed, dock gate closing, centering the ship and proceeding for seating on blocks.*
- *You save time and money.*

- ✓ Polluted water
- ✓ Slops
- ✓ Up to 400m³/H
- ✓ In N°2 and N°3 Dry-dock (avoiding costly shifting)
- ✓ On N°1 and N°4 repair piers
